

 2  
Bedrooms

 2  
Bathrooms

Situated in Lofthouse this attractive two Bed family home sits on a cul de sac location at the top of the Springfield estate. The property has full gas central heating and Upvc doors and Windows throughout. The property has two good size bedrooms, Lounge, Fitted Kitchen, Family bathroom and has a downstairs toilet. There is a parking space available along with a good size enclosed rear garden.

The home is currently available on a shared mortgage basis with the current vendors having a 25% share in the property on mortgage with a monthly rental on top. We are advised that there is the option to buy the full share of the property if required.

Situated in a particularly popular part of Lofthouse this attractive two bed family home sits in a cul de sac location at the top of the Springfield Estate.

The property has full gas central heating and Upvc windows and doors throughout. It has **two good size bedrooms, Attractive Lounge, fully Fitted Kitchen, Family bathroom and has a useful downstairs toilet.**

The home is currently available on a shared mortgage basis with the current vendors having a 25% share in the property on mortgage with a monthly rental on top. We are advised that there is the option to buy the full share of the property if required.

Springfield Road has great transport links between Wakefield, Leeds and beyond via bus, road, rail and motorway links all within a short drive or walk. Outwood rail station is 5 minutes drive away and there are a number of shops and supermarkets nearby. Outside to the front is a parking area and small front garden. To the rear is a good size enclosed private garden set over two levels.

There is a great selection of schools in the area all with good Ofsted ratings. All in all it would make a great property for first time buyer's or families alike.

### **The Property Consists of :**

#### **Front Entrance**

Upvc part glazed door and has attractive Laminate flooring

leading to the

#### **Lounge : (3.1m x 4.2m)**

This attractive lounge overlooks the front of the building and has Upvc Window, central heating radiator and access to a downstairs Wc

#### **Downstairs Wc.**

Off the lounge this good size Wc has toilet and sink

#### **Kitchen /Diner (3.9m x 3.2m)**

With a good size Upvc window overlooking the rear garden this light bright room has a good selection of modern light wood units to wall and floor offering good storage space. There is a range of contrasting work surfaces and a stainless steel sink drainer with mixer tap.

There is an integral cooker with hob and overhead extractor fan. The room has attractive laminate flooring and a Upvc glazed door to the enclosed rear garden.

On the first floor you have the landing area leading to

**Master Bedroom (3.8m x 3.2m)**

Overlooking the front of the property the master bedroom has a good size Upvc window, Central Heating Radiator and a useful storage cupboard.

**Bedroom 2 ( 4.0m x 2.7m )**

Overlooking the rear garden this room has Upvc window and Central Heating Radiator.

**Family Bathroom**

This good size bathroom has a three piece suite consisting Bath with overhead shower and glazed shower screen, Wc and Vanity style sink

the bathroom is attractively tiled and has a side window.

To the front of the property there is a dedicated parking space along with visitor parking available. A small front garden then to the rear there is a good sized enclosed rear garden set over two levels and offering privacy.

# Energy Performance Certificate

62 Springfield Road  
Lofthouse  
WAKEFIELD  
WF3 3FN

Dwelling type: Semi-detached House  
Date of assessment: 20 March 2011  
Date of certificate: 22 March 2011  
Reference number: 0889-3840-6978-9929-1761  
Type of assessment: SAP, new dwelling  
Total floor area: 56.98 m<sup>2</sup>

This home's performance is rated in terms of the energy use per square metre of floor area, energy efficiency based on fuel costs and environmental impact based on carbon dioxide (CO<sub>2</sub>) emissions.

Energy Efficiency Rating		Environmental Impact (CO <sub>2</sub> ) Rating	
	Current	Potential	
Very energy efficient - lower running costs			Very environmentally friendly - lower CO <sub>2</sub> emissions
(92 plus) <b>A</b>			(92 plus) <b>A</b>
(81-91) <b>B</b>			(81-91) <b>B</b>
(69-80) <b>C</b>	80	82	(69-80) <b>C</b>
(55-68) <b>D</b>			(55-68) <b>D</b>
(39-54) <b>E</b>			(39-54) <b>E</b>
(21-38) <b>F</b>			(21-38) <b>F</b>
(1-20) <b>G</b>			(1-20) <b>G</b>
Not energy efficient - higher running costs			Not environmentally friendly - higher CO <sub>2</sub> emissions
<b>England &amp; Wales</b>	EU Directive 2002/91/EC		<b>England &amp; Wales</b>
			EU Directive 2002/91/EC

The energy efficiency rating is a measure of the overall efficiency of a home. The higher the rating the more energy efficient the home is and the lower the fuel bills are likely to be.

The environmental impact rating is a measure of a home's impact on the environment in terms of carbon dioxide (CO<sub>2</sub>) emissions. The higher the rating the less impact it has on the environment.

## Estimated energy use, carbon dioxide (CO<sub>2</sub>) emissions and fuel costs of this home

	Current	Potential
Energy use	169 kWh/m <sup>2</sup> per year	162 kWh/m <sup>2</sup> per year
Carbon dioxide emissions	1.6 tonnes per year	1.5 tonnes per year
Lighting	£60 per year	£35 per year
Heating	£265 per year	£269 per year
Hot water	£92 per year	£92 per year

Based on standardised assumptions about occupancy, heating patterns and geographical location, the above table provides an indication of how much it will cost to provide lighting, heating and hot water to this home. The fuel costs only take into account the cost of fuel and not any associated service, maintenance or safety inspection. This certificate has been provided for comparative purposes only and enables one home to be compared with another. Always check the date the certificate was issued, because fuel prices can increase over time and energy saving recommendations will evolve.

To see how this home can achieve its potential rating please see the recommended measures.

Remember to look for the energy saving recommended logo when buying energy-efficient products. It's a quick and easy way to identify the most energy-efficient products on the market.

For advice on how to take action and to find out about offers available to help make your home more energy efficient, call 0800 512 012 or visit [www.energysavingtrust.org.uk](http://www.energysavingtrust.org.uk)

Certification mark

## About this document

The Energy Performance Certificate for this dwelling was produced following an energy assessment undertaken by a qualified assessor, accredited by Stroma Certification, to a scheme authorised by the Government. This certificate was produced using the SAP 2005 assessment methodology and has been produced under the Energy Performance of Buildings (Certificates and Inspections) (England and Wales) Regulations 2007 as amended. A copy of the certificate has been lodged on a national register.

Assessor's accreditation number: STRO004241  
Assessor's name: Leanne Brooksbank  
Company name/trading name: Plasmor Ltd  
Address: PO Box 44, Womersley Road  
Knottingley, WF11 0DN  
Phone number: 01977 673 221  
Fax number: 0  
E-mail address: leanne.brooksbank@plasmor.co.uk  
Related party disclosure: No related party

## If you have a complaint or wish to confirm that the certificate is genuine

Details of the assessor and the relevant accreditation scheme are as above. You can get contact details of the accreditation scheme from their website at [www.stroma.com](http://www.stroma.com) together with details of their procedures for confirming authenticity of a certificate and for making a complaint.

## About the building's performance ratings

The ratings on the certificate provide a measure of the building's overall energy efficiency and its environmental impact, calculated in accordance with a national methodology that takes into account factors such as insulation, heating and hot water systems, ventilation and fuels used. The average Energy Efficiency Rating for a dwelling in England and Wales is band E (rating 46).

Not all buildings are used in the same way, so energy ratings use 'standard occupancy' assumptions which may be different from the specific way you use your home. Different methods of calculation are used for homes and for other buildings. Details can be found at [www.communities.gov.uk/epbd](http://www.communities.gov.uk/epbd).

Buildings that are more energy efficient use less energy, save money and help protect the environment. A building with a rating of 100 would cost almost nothing to heat and light and would cause almost no carbon emissions. The potential ratings on the certificate describe how close this building could get to 100 if all the cost effective recommended improvements were implemented.

## About the impact of buildings on the environment

One of the biggest contributors to global warming is carbon dioxide. The way we use energy in buildings causes emissions of carbon. The energy we use for heating, lighting and power in homes produces over a quarter of the UK's carbon dioxide emissions and other buildings produce a further one-sixth.

The average household causes about 6 tonnes of carbon dioxide every year. Adopting the recommendations in this report can reduce emissions and protect the environment. You could reduce emissions even more by switching to renewable energy sources. In addition there are many simple everyday measures that will save money, improve comfort and reduce the impact on the environment. Some examples are given at the end of this report.

### Visit the Government's website at [www.communities.gov.uk/epbd](http://www.communities.gov.uk/epbd) to:

- Find how to confirm the authenticity of an energy performance certificate
- Find how to make a complaint about a certificate or the assessor who produced it
- Learn more about the national register where this certificate has been lodged
- Learn more about energy efficiency and reducing energy consumption

# Recommended measures to improve this home's energy performance

62 Springfield Road  
Lofthouse  
WAKEFIELD  
WF3 3FN

Date of certificate:  
Reference number:

22 March 2011  
0889-3840-6978-9929-1761

## Summary of this home's energy performance related features

The following is an assessment of the key individual elements that have an impact on this home's performance rating. Each element is assessed against the following scale: Compliant / Average / Good / Very good.

Element	Description	Current Performance	
		Energy efficiency	Environmental
Walls	Average thermal transmittance 0.31 W/m <sup>2</sup> K	Good	Good
Roof	Average thermal transmittance 0.16 W/m <sup>2</sup> K	Good	Good
Floor	Average thermal transmittance 0.21 W/m <sup>2</sup> K	Good	Good
Windows	High performance glazing	Very good	Very good
Main heating	Boiler and radiators, mains gas	Very good	Very good
Main heating controls	Programmer, room thermostat and TRVs	Good	Good
Secondary heating	None	-	-
Hot water	From main system	Very good	Very good
Lighting	Low energy lighting in 27.27273% of fixed outlets	Average	Average
Air tightness	(not tested)	-	-

**Current energy efficiency rating**

**C 80**

**Current environmental impact (CO<sub>2</sub>) rating**

**C 79**

Thermal transmittance is a measure of the rate of heat loss through a building element; the lower the value the better the energy performance.

## Low and zero carbon energy sources

None

## Recommendations

The measures below are cost effective. The performance ratings after improvement listed below are cumulative, that is they assume the improvements have been installed in the order that they appear in the table.

Lower cost measures (up to £500)	Typical savings per year	Performance ratings after improvement	
		Energy efficiency	Environmental impact
31 Low energy lighting for all fixed outlets	£21	B 82	C 80
Total	£21		

**Potential energy efficiency rating**

**B 82**

**Potential environmental impact (CO<sub>2</sub>) rating**

**C 80**

## Further measures to achieve even higher standards

The further measures listed below should be considered in addition to those already specified if aiming for the highest possible standards for this home. However you should check the conditions in any covenants, planning conditions, warranties or sale contracts.

32 Solar water heating	£27	B 83	B 82
33 Solar photovoltaic panels, 2.5 kWp	£201	A 97	A 95

**Enhanced energy efficiency rating**

**A 97**

**Enhanced environmental impact (CO<sub>2</sub>) rating**

**A 95**

Improvements to the energy efficiency and environmental impact ratings will usually be in step with each other. However, they can sometimes diverge because reduced energy costs are not always accompanied by a reduction in carbon dioxide (CO<sub>2</sub>) emissions.

## About the cost effective measures to improve this home's performance ratings

### Lower cost measures (typically up to £500 each)

These measures are relatively inexpensive to install and are worth tackling first. Some of them may be installed as DIY projects. DIY is not always straightforward, and sometimes there are health and safety risks, so take advice before carrying out DIY improvements.

#### 1 Low energy lighting

Replacement of traditional light bulbs with energy saving recommended ones will reduce lighting costs over the lifetime of the bulb, and they last up to 12 times longer than ordinary light bulbs. Also consider selecting low energy light fittings when redecorating; contact the Lighting Association for your nearest stockist of Domestic Energy Efficient Lighting Scheme fittings.

## About the further measures to achieve even higher standards

Further measures that could deliver even higher standards for this home. You should check the conditions in any covenants, planning conditions, warranties or sale contracts before undertaking any of these measures. If you are a tenant, before undertaking any work you should check the terms of your lease and obtain approval from your landlord if the lease either requires it, or makes no express provision for such work.

#### 2 Solar water heating

A solar water heating panel, usually fixed to the roof, uses the sun to pre-heat the hot water supply. This will significantly reduce the demand on the heating system to provide hot water and hence save fuel and money. The Solar Trade Association has up-to-date information on local installers and any grant that may be available.

#### 3 Solar photovoltaic (PV) panels

A solar PV system is one which converts light directly into electricity via panels placed on the roof with no waste and no emissions. This electricity is used throughout the home in the same way as the electricity purchased from an energy supplier. The British Photovoltaic Association has up-to-date information on local installers who are qualified electricians and on any grant that may be available. Planning restrictions may apply in certain neighbourhoods and you should check this with the local authority. Building Regulations apply to this work, so your local authority building control department should be informed, unless the installer is appropriately qualified and registered as such with a competent persons scheme<sup>1</sup>, and can therefore self-certify the work for Building Regulation compliance.

## What can I do today?

Actions that will save money and reduce the impact of your home on the environment include:

- Ensure that you understand the dwelling and how its energy systems are intended to work so as to obtain the maximum benefit in terms of reducing energy use and CO<sub>2</sub> emissions.
- Check that your heating system thermostat is not set too high (in a home, 21°C in the living room is suggested) and use the timer to ensure you only heat the building when necessary.
- Turn off lights when not needed and do not leave appliances on standby. Remember not to leave chargers (e.g. for mobile phones) turned on when you are not using them.
- Make sure your hot water is not too hot - a cylinder thermostat need not normally be higher than 60°C.
- Close your curtains at night to reduce heat escaping through the windows.
- If you're not filling up the washing machine, tumble dryer or dishwasher, use the half-load or economy programme.
